Significant Disproportionality - Identification

Significant Disproportionality

District Not Flagged for Significant Disproportionality in this area.

Identify Trends/Notable Observations	Improvement Planning and Activities
Palmerton has no trends or patterns in the area of identification.	

Non-Resident Students Oversight

1. Is your district currently a host district for a 1306 facility?

No

1. Describe the host's educational oversight to ensure students with disabilities are educated in the least restrictive environment while in the 1306 facility? (If not a host, answer as if you were.)

Palmerton Area School District (PASD) does not currently have a 1306 facility within the school district borders. If there was a 1306 facility within the district boundaries, the district would oversee the process for ensuring that students with disabilities are educated in the least restrictive environment. The Special Education Department would collaborate with the facility, parent/ guardians/ surrogate and county agency personnel. The student's educational records would be requested from the sending district. The student's Individualized Education Plan services would be implemented within 5 business days. The Individualized Education Plan services offered would be comparable to the previously agreed upon Individualized Education Plan and Notice of Recommended Educational Placement. If the Notice of Recommended Educational Placement and Individualized Education Plan were unable to be implemented directly, the Special Education Director will explore options within the local intermediate unit, neighboring school districts and private programming options.

2. Describe the district's procedures for communicating with 1306 facilities and how the district ensures a successful transition back to school?

The Palmerton Area School District and the 1306 facility would work very closely at providing successful transition back to school. The PASD would work to provide opportunities for students to work with non-disabled peers. The Palmerton Area School District would act as the LEA of the 1306 facility and collaborate and communicate with the student's home district. When the student is making progress and is on track for a return to the home district transition opportunities would be provided. These opportunities would include increase time in the general education setting, thoughtful planning of inclusion activities, and identification of transition goals. The timeline would be clearly defined and regular meetings will be held.

Incarcerated Students Oversight

1. Does the district have an adult correctional facility that houses juveniles within its geographical boundaries?

No

1. Describe the system of oversight the District would implement to ensure that all incarcerated students who may be eligible for special education are located, identified, evaluated and when deemed eligible, are offered a free appropriate public education (FAPE).
There are currently no facilities within the Palmerton Area School District catchment area.

Least Restrictive Environment

1. Review the district's data for Least Restrictive Environment. Highlight areas of improvement.

Palmerton Area School District focuses on having our students participate in the general education setting to the maximum amount possible. The amount of support provided to students is based on individual needs for supports and services. The district's goal is to increase the Least Restrictive Environment to remain at or above the State Performance Plans indicators of education inside the regular education class 80% or more of the day. Upon review of the Special Education Data Report from the 2019-2020 school year, PASD is below the state average of special education students. Palmerton Area School District is also just under the state average for students being educated in the general education setting less than 40% of the school day. The following information was collected from the Special Education Data Report from the past few years. This information reflects the continuous monitoring of the amount of time students spend in the Least Restrictive Environment.

2017-2018	2018-2019	2019-2020	State	Inside the Regular Class	58.1%	59.4%	58.8%
61.5%	80% or more	Inside the Regular Class	7.4%	8.4%	8.6%	8.1%	Palmerton Area School District will

continue to monitor our data of Least Restrictive Environment. At each student's IEP meeting the opportunity for involvement in the general education setting will be evaluated and adjusted based on individual need. The Palmerton Area School District will continue to take steps towards furthering our implementation of our co-teaching model, increasing our positive behavior support plans and improving our professional development, to ensure that we are educating our students in the least restrictive environment.

2. What universal practices does the district utilize to address the academic and social/emotional needs of all students in need of accommodations to their learning environments?

Palmerton Area School District provides a continuum of special education supports and services to students. PASD offers these supports and services within our neighborhood schools, within the Carbon Lehigh Intermediate Unit #21, within local neighboring districts and Private Programming. The continuum of supports ranges from Itinerant to Supplemental to Full Time. Services offered with the Palmerton Area School District include Speech and Language, Learning Support, and Life Skills. Services provided by CLIU #21 are Life Skills, Multiple Disabilities Support behavioral/ functional, school-based Emotional Support, center-based Emotional Support, and Partial Hospitalization Program. Over the past few years, PASD has been providing our Speech and Language Support and now offers the full continuum of Life Skills from kindergarten through age 21.

3. Describe the academic programming and training efforts the LEA utilizes to ensure meaningful participation of students with disabilities in the general education curriculum.

Professional development opportunities are provided regularly to ensure that students with disabilities are participating in the general education curriculum. These trainings are offered both during summer hours and during the school year. The professional development focuses on Confidentiality, Trauma Informed Care, Safety Care, Functional Behavior Assessment, Progress Monitoring, Individual Education Plans, Reading, Math and other topics that would best provide support to our staff in order to ensure meaningful participation in the general education curriculum for students with disabilities.

4. Describe the supplementary aids and services the LEA utilizes to ensure meaningful participation of students with disabilities in extracurricular activities.

All students are encouraged to participate in extracurricular activities. If a student with disabilities wants to participate in extracurricular activities, supplementary aids and services would be offered. Some of the options for supports that ensure meaningful participate in

extracurricular activities could be assistive technology, adaptations for accessibility, behavior support planning, and professional development for staff. We have students with disabilities that participate in track, cheerleading, football, basketball, and wrestling.

- Describe the District procedures, which ensure that, to the maximum extent appropriate, children with disabilities placed in private institutions are educated with non-disabled children and have the opportunity to participate in district lead extracurricular activities?

Palmerton Area School District LEA representatives are required to participate in the IEP for students that are placed in private programming. The IEP team determines the supports and services required by each individual student. At the IEP team annual meeting, the determination is made that the students are educated in the Least Restrictive Environment and receive instruction in the general education curriculum with their non-disabled peers. Students are provided the opportunity to participate in extracurricular activities. Students would be provided transportation if and when necessary. Palmerton does currently have students in private programming participating in extracurricular activities.

- Discuss the district’s need to build capacity and expand programs and services in an effort to provide a continuum of services. (Consider the out of district placement chart)

Palmerton Area School District annually reviews the needs of the district in an effort to provide a continuum of services. The LEA continues to expand the district-run supports when possible. The Director of Special Education reviews special education caseloads in the district, as well as outplaced students, and continues to evaluate the need for programs. The Director of Special Education also attends all IU facility meetings in order to have input into what programs need to be developed for the county while providing specific input from PASD. The District has developed a partnership with St. Luke's to provide on-site mental health in all of the district buildings. In the past few years PASD has been providing our Speech and Language Support and now offers the full continuum of Life Skills from kindergarten through age 21.

Positive Behavior Support

Date of Approval
2021-07-20

Uploaded Files
behavior support.pdf

1. How does the district support the emotional, social needs of students with disabilities?

Positive behavior support is an application of a behaviorally-based systems approach to enhance the capacity of schools, families, and communities to design effective environments that improve the link between research- validated practices and the environments in which teaching and learning occur. District policy affirms its belief that students require a safe and supportive environment in order to achieve their potential. The Palmerton Area School District specifically addresses behavioral support services through its policies in the areas of: 113.2 Behavior Support, 218 Student Discipline, 113.1 Discipline of Students with Disabilities, and 233 Suspension and Expulsion. These policies apply to all students in the Palmerton Area School District unless otherwise indicated.

2. Describe training provided to staff in the use of positive behavior supports, de-escalation techniques and responses to behavior that may require immediate intervention.

Palmerton Area School District is committed to managing crisis behavior responsively and effectively. The district has three trainers currently certified to provide Safety care professional development to specified special and regular education teachers as deemed appropriate. This group of selected staff has Safety Care training so they are prepared to de-escalate students if/when needed. Teachers and staff have the opportunity to become Safety Care certificated each summer. Instructional assistants have the opportunity to access the Therapeutic Case Manager for individual consultation. Staff participates in general and building-specific training regarding the Positive Behavior Support programming. Training in Positive Behavior Support continues to emphasize school-wide systems of support including proactive strategies for defining, teaching, and supporting appropriate student behaviors to create positive school environments in areas including the classroom and other school settings. Supervision of professional and support staff that provide direct services to students includes evaluation of performance in student engagement and promoting and modeling positive behavior in the school setting. Paraprofessionals and teachers continue to review techniques for data collection, functional behavioral assessment, and analysis. Attention is focused on creating and sustaining primary (school-wide), secondary (classroom), and tertiary (individual) systems of support that improve lifestyle results (personal, health, social, family, work, recreation) for students. Staff meetings continue to review best practice techniques for classroom and school implementation. The District is committed to training staff in the use of proven de-escalation techniques for use in assisting students in managing their own behavior. Evidence of this commitment is the certification of three staff members as Safety Care Trainers. This training is mandated for identified paraprofessionals, special educators, and all building level "Crisis Team" members. The emphasis of the training is on the de-escalation of behavior. However, staff are also trained in the use of non-violent intervention techniques when physical intervention is needed to prevent injury to self or others when de-escalation techniques have not been successful or imminent harm is apparent. The initial training consists of twelve (12) hours of classroom and interactive instruction. A biennial recertification process consists of six (6) hours of review and training.

3. Describe the district positive school wide support programs.

The elementary buildings implement a School-wide Positive Behavior Support Program for all students in grades K - 8. This model promotes a positive school climate and culture while also making school and learning more enjoyable for all students and staff. Our school-wide program reinforces desirable, cooperative behavior through the use of SOAR tickets/ Bombers Bucks, nurtures the development of self-discipline by the teacher, encourages the student to accept his/her behavior, builds respect, and fosters cooperation by including the student in decision making. Programs and contingencies are outlined in building handbooks, on the schools' websites, and in parent/guardian information packets welcoming them to the new school year.

4. Describe the district school-based behavior health services.

Students and families will have access to behavioral health supports including school counselors, school psychologists, and third-party providers to assist students. Additionally, students may access the Safe2Say reporting tool and Student Assistance Program when needed. Other mental health and behavioral health resources and supports for students are available on our website.

5. Describe the district restraint procedure.

Physical restraints to control acute or episodic aggressive behavior may be used only when the student is acting in a manner that presents a clear and present danger to the student, other students or employees, and only when less restrictive measures and techniques have proven to be or are less effective. PASD's restraint procedure ensures positive behavior support programs are utilized, including the training of personnel for the use of specific procedures, methods and techniques, and for having written policies and procedures on the use of positive behavior management support techniques. This includes obtaining parental consent prior to the use of restraints or intrusive procedures that interfere with their own learning or that of others.

Intensive Interagency

Please address any areas of concern with students who are placed on Instruction Conducted in the Home or who are at a substantial risk of waiting more than 30 days for an appropriate educational placement.

Palmerton has zero students who were placed on Instruction Conducted in the Home. Palmerton has zero students who are at a substantial risk of waiting more than 30 days for an appropriate educational placement.

- x There are a full range of services, programs and alternative placements available to the school district for placement and implementation of the special education programs in the school district.
- x The school district has adopted a child find system to locate, identify and evaluate young children and children who are thought to be a child with a disability eligible for special education residing within the school district's jurisdiction. Child find data is collected, maintained, and used in decision-making. Child find process and procedures are evaluated for its effectiveness. The school district implements mechanisms to disseminate child find information to the public, organizations, agencies, and individuals on at least an annual basis.
- x The school district has adopted policies and procedures that assure that students with disabilities are included in general education programs and extracurricular and non-academic programs and activities to the maximum extent appropriate in accordance with an Individualized Education Program.
- x The school district will comply with the PA Department of Education, Bureau of Special Education's revision notice process.
- x The school district follows the state and federal guidelines for participation of students with disabilities in state and district-wide assessments including the determination of participation, the need for accommodations, and the methods of assessing students for whom regular assessment is not appropriate.
- x The school district affirms the Pennsylvania Department of Education that funds received through participation in the medical assistance reimbursement program, ACCESS, will be used to enhance or expand the current level of services and programs provided to students with disabilities in this local education agency.
